TOYOTA WEB3 HACKATHON SUBMISSION

Empower your team with personalized merit-based NFTs that
reflect their project contributions

THE PROBLEM

Toyota is on a mission to continue the Kaizen culture at their workplace, in the form of a DAO.

Manage projects as a DAO

Introduce the DAO concept to the company and the employees

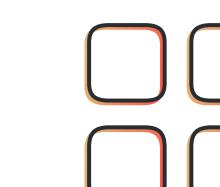

Reduce the manager's workload

Allow the group to make decision themselves

Decentralize decision-making

Empower employees of Toyota to act more autonomously

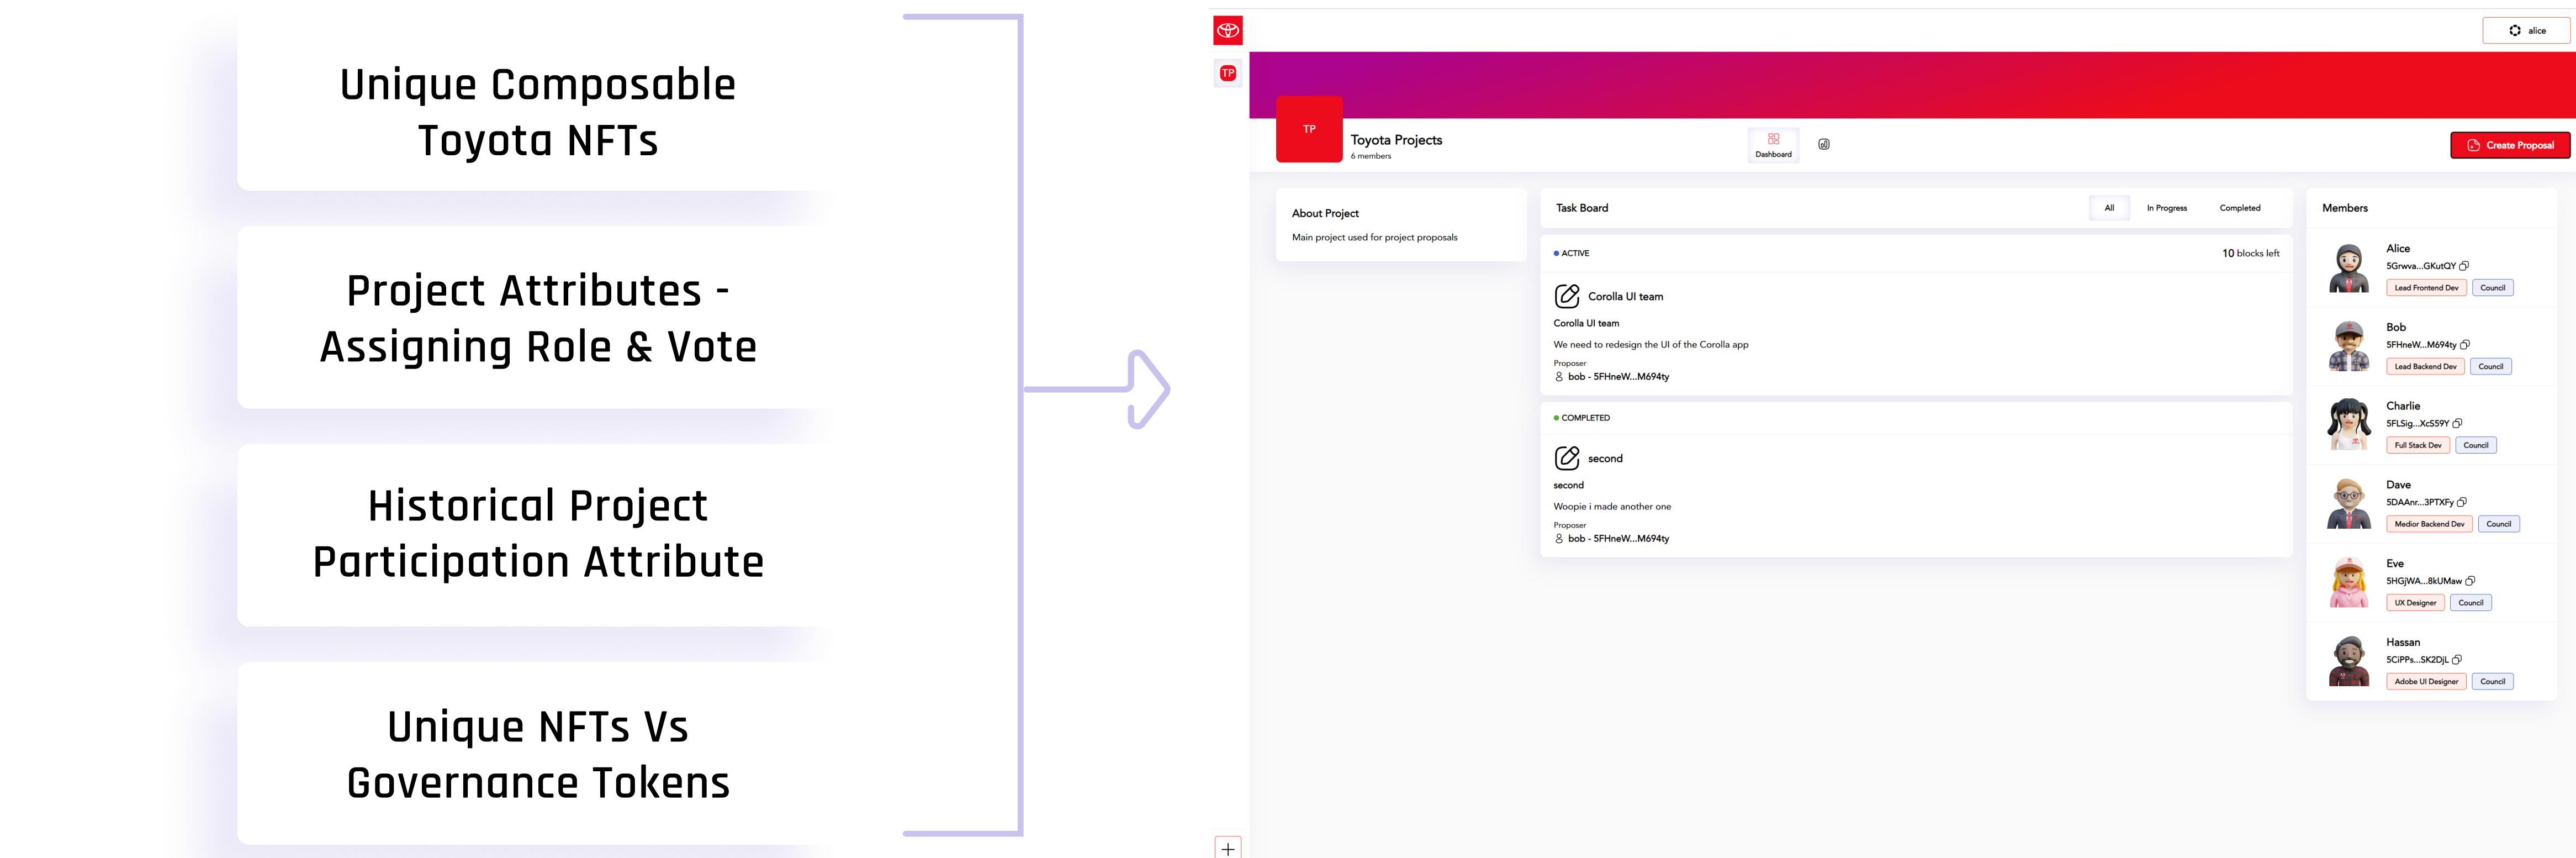

Improve Employee Impact on Company

should facilitate team formation, issuance of tokens, voting, etc.

THE SOLUTION

Our system streamlines Toyota's project management by using DAOs and NFTs, reducing the workload for managers.

SYSTEM DESIGN

Toyota employee NFT can be equipped with various attributes that represent their achievements, and position. These attributes determine which proposals they can vote on and their voting power.

Toyota NFT:

- Project Attribute (i.e. 1 vote)
 - Voting Power
- Participation Attribute
 - Tracks your participation in previous projects
